

INCOME ELIGIBILITY CHART FOR REGULAR ASSISTANCE PROGRAM

For households required to apply for assistance on form DCO-9495, income eligibility will be determined by comparing the household's MCI with the income eligibility chart below. The income eligibility limits are set at 60% of the state's median income level.

Household (1) Size	MCI (2)	Household (1) Size	MCI (2)
1	\$ 1,482	11	\$ 4,189
2	1,938	12	4,275
3	2,394	13	4,360
4	2,850	14	4,445
5	3,306	15	4,531
6	3,762	16	4,616
7	3,847	17	4,702
8	3,993	18	4,787
9	4,018	19	4,873
10	4,104	20	4,958

- (1) For each additional household member over the household size of 20, add **\$85.50** to the maximum MCI shown for a household size of 20.
- (2) MCI should not be rounded when using the eligibility chart. If the household's MCI is \$.01 over the level shown for the household size, the household is ineligible for assistance (see section 6341 for procedures for income computation).
