

ICD-9 to ICD-10 Crosswalk Diagnoses by Specialty

Information was released this week from WEDI in collaboration with AAPC regarding the most common diagnoses typically used on “SuperBills”. The following information is provided as a free resource for crosswalk translations that may be applicable to your practice.

You can click on the link below and access translations for 164 diagnosis codes identified as most commonly used by family practice physicians. We hope you find this information helpful as you continue your individual remediation efforts within your office or facility.

Remember, you may also submit questions related to ICD-10 via the website email listed below.
