PROCEDURES

4011.5.0 Requests for Accounting of PHI Disclosures

Clients (or their legal representatives) may make their requests in-person, by letter, by facsimile or orally by phone. A request for an accounting of PHI disclosures must identify the record holder and the period of time covered by the request. When a request for an accounting is received:

- A. The DHS staff member receiving the request for an accounting must document the identity of the requestor by identification badge, driver's license, written statement of identity on agency letterhead, or similar proof. When an oral request is received in person or by phone, DHS will confirm the request with a written statement describing the request and obtain a client signature for authentication.
- B. When the request for accounting is documented and accepted, the client will be provided an acknowledgement statement indicating when he can expect to receive an accounting. Form DHS 4009 will be used for this purpose.
- C. The client's health record will be reviewed to determine if PHI disclosures have occurred during the time period covered by the client's request. This

will be accomplished through manual review of the Protected Health Information (PHI) Tracking Sheet, DHS-4002, or inquiry to the PHI Disclosure Tracking system. If accounting of disclosures cannot be completed within 60 days of the request, the client will be notified using form DHS 4011.

D. When a list of disclosures has been compiled, form DHS 4010 will be completed and the form and list of disclosures will be forwarded to the client.
