Arkansas Department of Human Services
2019 Non-Emergency Transportation Databook

DATA SOURCES

The Arkansas Department of Human Services (DHS) provided July 2016 to June 2017 membership and detailed incurred encounter claims as of April 2018. We understand the current NET vendors provided DHS with the detailed encounter claims as part of their regular data submission. This encounter data included medical provider identification, regional identification, trip counts, leg counts, and mileage. Given the current capitation arrangement of the NET program, encounter data is not available by payment date to validate the completeness of the data or calculate any outstanding liability. However, we reviewed the utilization data on a monthly basis and determined no adjustment is needed for additional claims runoff.

DATABOOK

We summarized the historical July 2016 to June 2017 membership and utilization in Exhibits A – G, each of which represents a distinct region. These exhibits include the members eligible to receive NET services for each of the region's counties by month. Additionally, we included the following utilization information:

- *Trip legs* – Summarized directly from the provided encounter data, this data accounts for the various stops within a trip. For example, a beneficiary may go to the doctor, the pharmacy, and a second appointment all within one trip on the same day.
- *Trips* – Calculated as one trip per encounter record, this data represents the unique trips provided by the NET vendor. The number of canceled trips reported in the data is immaterial in the historical time period. Such claims are not included in the databook.
- *Mileage* – Summarized directly from the provided encounter data, this contains the actual mileage incurred.

CAVEATS AND LIMITATIONS

Milliman relied on multiple sources of encounter and eligibility data to develop the NET data book, including detailed encounter data, eligibility data, capitation payment data, and provider information from DHS. **Milliman did not audit any of the data sources**, but did assess the data for reasonableness as documented in this report.

Milliman relied on DHS for the accuracy of its eligibility data and for the collection and processing of the encounter. If the data used is inadequate or incomplete, the results will be likewise inadequate or incomplete.

Future capitated experience under the NET program will differ from the historical NET data book data due to enrollment changes, health care utilization and cost trend, medical management changes, provider reimbursement changes, and many other factors.

The NET data book was prepared solely to provide relevant historical data and background information to potential contractors responding to the RFP. It may not be appropriate for other purposes. Milliman does not intend to benefit, and assumes no duty or liability to, other parties who receive this work. The NET data book should only be reviewed in its entirety.

The NET data book results are technical in nature and are dependent upon specific assumptions and methods. No party should rely on the NET data book without a thorough understanding of those assumptions and methods. Such an understanding may require consultation with qualified professionals.

Guidelines issued by the American Academy of Actuaries require actuaries to include their professional qualifications in all actuarial communications. Michael Cook and Greg J. Herrle are actuaries at Milliman, members of the American Academy of Actuaries, and meet the qualification standards for performing the analyses in this report.

The terms of Milliman's contract with the Arkansas Department of Human Services #4600041898 apply to this letter and its use.
