RE: Therapy treatment services rate increase

The Arkansas Department of Human Services, Division of Medical Services (DMS) has completed its review of occupational therapy, physical therapy, and speech-language pathology rates in accordance with Executive Order 19-02. The review will result in increases to occupational therapy, physical therapy, and speech-language pathology treatment service rates over a two (2) year period. An initial rate increase of sixteen percent (16%) will apply to service dates starting April 9, 2022, through March 31, 2023. The remaining additional fifteen percent (15%) increase will be implemented April 1, 2023.

The additional rate increases will be effective on April 1, 2023. There is no action required from providers related to the rate increases. Providers can submit billing on or after April 1, 2023. Please review the table below of the current rate and the increased rate.
