

Program of All-Inclusive Care for the Elderly (PACE)

PACE is a Medicare program and Medicaid state option that provides community-based care and services to people age 55 or older who otherwise would need nursing home level of care. PACE was created as a way to provide the client, the client's family, caregivers, and health care providers flexibility to meet the client's health care needs and to help the client to continue living in the community.

A team of health care professionals provides coordinated care to meet the client's needs. These professionals are also experts in working with older people. They work together with the client and the client's family (if appropriate) to develop the most effective plan of care. PACE provides all the care and services covered by Medicare and Medicaid as authorized by the health care team. They also cover additional medically-necessary care and services not covered by Medicare and Medicaid that the team may decide the client needs. PACE provides coverage, such as doctor care, transportation, home care, etc.

PACE is currently available in the following Northeast and Central Arkansas counties:

Northeast Counties
