INTRODUCTION AND INTENT

The Arkansas Department of Human Services, DCO, Office of Program and Grant Management (DHS/DCO/OPGM) establishes guidelines for the awarding of discretionary grants as authorized by the Arkansas Community Services Block Grant (CSBG) State Plan.

The primary intended use of the grant funds awarded to the state of Arkansas and to Arkansas subgrantees is “to provide assistance to local communities in Arkansas, working through a network of Community Action Agencies and other neighborhood-based organizations, for the reduction of poverty, the revitalization of low-income communities, and the empowerment of low-income families and individuals in rural and urban areas to become fully self-sufficient.”

CSBG Purpose and Goals:

- Promoting maximum participation of low-income people and communities
- Leveraging resources of other anti-poverty programs
- Strengthening community capabilities for planning or coordinating resources for local needs and conditions of poverty
- Using innovative approaches to address causes and conditions of poverty
- Measuring impact to ensure accountability and ongoing data-driven quality improvement

The National Community Action Network Theory of Change Community Action Goals

1. Individuals and families with low incomes are stable and achieve economic security.
2. Communities where people with low incomes live are healthy and offer economic opportunity.
3. People with low incomes are engaged and active in building opportunities in communities.

As described in the authorizing legislation (CSBG Act), these “goals are achieved through:

- A. the strengthening of community capabilities for planning and coordinating the use of a broad range of Federal, state, local, and other assistance (including private resources) related to the elimination of poverty, so that this assistance can be used in a manner responsive to local needs and conditions.
- B. the organization of a range of services related to the needs of low-income families and individuals, so that these services may have a measurable and potentially major impact on the causes of poverty in the community and may help the families and individuals to achieve self-sufficiency.
- C. the greater use of innovative and effective community-based approaches to attack the causes and effects of poverty and of community breakdown.
- D. the maximum participation of residents of the low-income communities and members of the groups served by programs assisted through block grants made under the CSBG Act to empower such residents and members to respond to the unique problems and needs within their communities; and
- E. the broadening of the resource base of programs directed to the elimination of poverty to secure a more active role in the provision of services for private, religious, charitable, and neighborhood-based organizations; and individual citizens, and business, labor, and professional groups, who can influence the quantity and quality of opportunities and services for the low-income.”
